

# New Zealand Fire Doors

## INTRODUCTION

### FIRE DOORS

Fire Rated Doorsets are required to be fire tested, and consequently design constraints will apply to any given doorset.

This Design Guide sets out these factors and offers reference and commentary aimed at ensuring compliance with **AS/NZS 1905 Part 1. Fire Resistant Doorsets**.

Compliance with other requirements of the Building Code is the responsibility of the specifier.

In the interests of clarity not all approvals are identified in this guide. As a result of our ongoing development program the details are subject to change without notice or incurring obligation.

### OTHER PRODUCTS AND FEATURES AVAILABLE FROM NZ FIRE DOORS
